

Measuring Sound Sensitivity Study – Online Study

Principal Investigator: Dr. Elina Birmingham, Simon Fraser University, Burnaby, B.C.

What do we want to know?

We are investigating how individuals experience sounds in their everyday environments, and how sensitivity to noise, when it occurs, impacts daily living and mental health. You do not need to have sensitivity to noise to participate in the study.

Who are we looking for?

Adults over the age of 19 years old.

About the study:

Participants will be asked to fill out a series of questionnaires, including basic information about themselves, their social behaviours, their experiences with sounds, and questions about satisfaction with various areas of life.

The study should take approximately 1 hour. As a thank-you for your time, we will enter you into a draw to win one of four \$50 (CAD) Amazon gift cards.

How to sign up:

Email study coordinator Troy Boucher at tboucher@sfu.ca for more information.
